

Canadian spotlight 17.2: Key additions from the second half of May 2022

In the second half of May, contributing Canadian evidence-synthesis teams have shared with us four newly completed evidence syntheses which are listed in the table below. From the COVID-END taxonomy, these syntheses provided insight focused on public-health measures (n=3) and clinical management (n=1).

Taxonomy section	Title	Type of product	Date of last search (and publication)	Evidence synthesis team
<ul style="list-style-type: none"> Public-health measures 	What is the effectiveness of available COVID-19 vaccines for variants of concern in adults over time frames up to 120 days?	Update to a living evidence synthesis	2022-05-25 (published 2022-05-26)	Health Information Research Unit, McMaster University
<ul style="list-style-type: none"> Public-health measures 	What is the effectiveness of available COVID-19 vaccines for children and adolescents, including variants of concern?	Update to a living evidence synthesis	2022-05-23 (published 2022-05-27)	Faculty of Medicine, University of Antioquia & Health Information Research Unit, McMaster University
<ul style="list-style-type: none"> Public-health measures 	What is the evidence on timing and outcomes of elective surgery after a COVID infection?	Rapid review	2022-05-20 (published 2022-05-27)	Saskatchewan Health Authority; University of Saskatchewan; Saskatchewan Health Authority Council
<ul style="list-style-type: none"> Clinical management 	Evidence brief on the associations and safety of COVID-19 vaccination and post COVID-19 condition: Update 1 (For those interested in accessing the full copy of the rapid review, please	Evidence brief	2022-04-04 (published 2022-04-14)	Emerging Science Group, Public Health Agency of
