

Canadian spotlight 22.1: Key additions from the first half of October 2022

In the first half of October, contributing Canadian evidence-synthesis teams have shared with us three newly completed evidence syntheses which are listed in the table below. From the COVID-END inventory, the syntheses provided insight focused on public-health measures and economic and social responses (n=1), and public-health measures (n=2).

Taxonomy section	Title	Type of product	Date of last search (and publication)	Evidence synthesis team
<ul style="list-style-type: none"> Economic and social response Public-health measures 	Understanding the role of personal risk perceptions during the COVID-19 pandemic: A rapid behavioural science evidence synthesis	Rapid synthesis	2022-09-30 (published 2022-10-14)	The Ottawa Hospital Research Institute
<ul style="list-style-type: none"> Public-health measures 	What is the long-term effectiveness of available COVID-19 vaccines for adults, including for variants of concern and over time frames beyond 112 days in those with a primary series and beyond 84 days in those with a primary series and an additional dose?	Update to a living evidence synthesis	2022-10-12 (published 2022-10-13)	The Montreal Behavioural Medicine Centre, Concordia University
<ul style="list-style-type: none"> Public-health measures 	What is the effectiveness of available COVID-19 vaccines for adults, including for variants of concern and over time frames up to 120 days?	Update to a living evidence synthesis	2022-10-12 (published 2022-10-12)	Health Information Research Unit, McMaster University
